Office Action Summary	Application No. 10/720,613	Applicant(s) BILLIET ET AL.	
	Examiner Daniel J. Jenkins	Art Unit 1742	

**– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –
Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The Examiner has carefully considered Applicant's Response of 10/14/05. The Examiner finds that the amendment to claim 8 has rendered the claim inoperative, and has made the following rejection.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 8-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 8 contains limitations to wherein the supercritical fluid is maintained at a density equal to that of the green body being processed. The Examiner finds that the act of maintaining the supercritical fluid, for example xenon, at a pressure above its critical pressure, would not result in a density that would equate that of, for example, the density of a stainless steel body, as found at page 12 of the pending Specification, which is greater than 7.8g/cc. Thus it appears that the broad range of Applicant's claim is not capable of operating over a range of green body densities.

4. Claims 1-7 are allowable, the prior art not teaching or suggesting loading a weighing device into the chamber of the hot isostatic press to be filled with a supercritical fluid.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel J. Jenkins whose telephone number is 571-272-1242. The examiner can normally be reached on M-TH6:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King can be reached on 571-272-1242. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
